Trip Validity Reconciliation

Trip Validity	Raw Trip Rows
Valid	3251098
Excluded	224106
Total	3475204

Data Quality & Methodology

Item	Section	Details
Measures	Interpretation	Amount and average measures use valid trips.
Blank rate codes	Interpretation	Blank rate codes are retained as a data-quality signal.
Relationships	Model	Fact Trips is connected to Date, Pickup Zone, Drop-off Zone, Payment Type, and Rate Code using one-to-many, single-direction relationships.
Report filter	Scope	Month Number less than 2 keeps the report within January.
Data period	Scope	NYC Yellow Taxi raw trip data for January 2025.
Data source	Source	Official NYC TLC monthly Parquet data and taxi_zone_lookup.csv loaded from Azure Blob Storage.
Boundary record	Interpretation	One February 1 boundary record exists in the raw file and is excluded by the January filter.
Excluded trips	Validation	Rows where Trip Validity equals Excluded.
Valid trips	Validation	Rows where Trip Validity equals Valid.
